

OSPI CTE Course Program Re-Approval Process

The purpose of CTE course and program re-approval processes is to make certain that all CTE courses:

- Ensure academic rigor
- Align with the state’s education reform requirements and CTE program standards
- Help address the skills gap of Washington’s economy
- Maintain strong relationships with local CTE advisory councils for the design and delivery of career and technical education

Beginning in the 2017-18 school year and continuing through the 2022-23 school year all Career and Technical Education courses will achieve re-approval as part of a program re-approval process. During the re-approval launch year (17-18), districts will submit all active programs for approval. In following years, districts will submit the active assigned program area according to group assignment.

Re-approval review and submission windows will have enforced due dates and districts that do not submit programs by the assigned date will submit all courses for approval in the course approval system to maintain compliance.
